**Object: Industrial subcontracting for production and characterization of pb-16li alloy (production trial) in tbn (eurofusion – iqs), contract financed by the European Commission under the project 101052200 Eurofusion**

Date: 24/05/2022

Hour: 11:00 am

### Attendees

President:

- The Managing Director of IQS

Vocals:

- The Director of Administration of IQS
- The Director of IQS Tech Transfer
- The Principal Investigator of the Eurofusion project at IQS

### Agenda

1. Opening envelop 1
2. Content analysis of envelop 1

### Session progress

1. The president starts the meeting informing that only one proposal has been submitted in due time and form. The only bidder presented is a partnership agreement between FUS\_ALIANZ® Science, Engineering and Consulting, SL, Fundación Idonial and Riera Nadeu, SA.
2. The contracting committee considers that the documentation submitted in envelope 1 meets the requirements set on the bases.
3. The contracting committee warns that the partnership designs as subcontractor nomines the Institute of Physics University of Latvia and Universitat Rovira i Virgili. However, documents submitted do not include an explanation of which services or tasks will be subcontracted with those entities.

### Agreements

The contracting committee, unanimously, agrees to:

1. Admit to the procedure the bid submitted by FUS\_ALIANZ® Science, Engineering and Consulting, SL, Fundación Idonial and Riera Nadeu, SA.
2. Require the bidder to provide clarification, within three working days, about on which tasks of the technical bases are intended to be subcontracted to Institute of Physics University of Latvia and Universitat Rovira i Virgili.
3. Simultaneously, ask the bidder to provide the password to open the envelope 2.

The president concludes the act, and the present act is extended and signed by the attendees to make proof of the agreements set.
